

Updated package pipeline:

...

InitializationSystemGroup

└─ LittlePhysicsBootstrapSystem [public]

SimulationSystemGroup

├─ FixedStepSimulationSystemGroup

├─ LittlePhysicsSystemGroup [internal]

    // loops: TimeScale × SubstepsCount

    ├─ LittlePhysicsInternalSystemGroup [internal, OrderFirst]

        ├─ GravitySystem [internal, OrderFirst]

        ├─ FrictionSystem [internal, after Gravity]

        ├─ CollisionMapUpdateSystem [internal, after Friction]

        ├─ CollisionDetectionSystem [internal, after MapUpdate]

        ├─ CollisionVelocitySystem [internal, after Detection]

        ├─ SurfaceCollisionSystem [internal, after CollisionVelocity]

        └─ PairsDebugSystem [public, OrderLast]

    ├─ LittlePhysicsUserSystemGroup [public, after Internal]

        └─ (your mid-step systems)

    └─ LittlePhysicsLateSystemGroup [internal, OrderLast]

        └─ PhysicsVelocitySystem [internal, OrderLast]

├─ LittlePhysicsExportGroup [public, after FixedStep]

    ├─ LittlePhysicsInternalExportGroup [internal]

        └─ ExportPhysicsDataSystem [internal]

    └─ (user systems — use OrderLast to run after export)

LateSimulationSystemGroup

├─ LittlePhysicsImportGroup [public]

├─ (user systems — use OrderFirst to run before import)

├─ LittlePhysicsInternalImportGroup [internal]

    ├─ PhysicsStepSystem [internal, OrderFirst]

    └─ ImportPhysicsDataSystem [internal]
